IT IS EXTREMELY UNLAWFUL TO DISCLOSE ANY OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IF PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED. HOWEVER, INFORMATION CONTAINED IN BODY OF THE FORM MAY BE UTILIZED AS DEEMED NECESSARY BY THE RECEIVING AGENCY.

THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH
USE OF TRAINED INTELLIGENCE ANALYSTS

50X1-HUM

1. Kapen (E-16) Ammunition Dump is located approximately eight kilometers ESE of Dessau, south of the Dessau-Oranienbaum railway line. The dump actually begins at the 7.3 kilometer stone and ends at the 8.3 kilometer stone from Dessau on the Dessau-Oranienbaum road. Kapen Station is situated opposite the main entrance and the main guard of the dump. The branch railway line to the dump is shown on the attached sketch.
2. The dump itself is surrounded by barbed wire, which is in turn encircled by a strip of wood. Trees and bushes still stand within the dump among the bunkers as a camouflage measure, but outside the strip of wood is a 100-meter broad strip of land which has been completely denuded of trees, etc., and in this barren strip a Soviet Punishment Company 200 men strong do guard duty. These troops are quartered in tents and earth bunkers in the wood surrounding the dump.
3. Weapon pits and trenches were thrown up in the barren strip in early June 1948. Encircling defences are being constructed for the dump. Security measures are such that the 200 Russians do guard duty at the entrances to the dump, at the posts (wachen) shown on the sketch, in the surrounding wood, and on the barren strip, while 270 German police form an extra guard by ringing the Russian troops.
4. [redacted] fifteen wagons of artillery and anti-tank ammunition were unloaded in the dump between 8 and 12 June 1948. The dump contains mainly 76.2 mm anti-tank shells and artillery ammunition of various calibers between 105 mm and 210 mm packed in Körben. The dump disposes in all of 100 bunkers (type shown on sketch), which are camouflaged with soil and brushwood.
